Motivated and adaptable Web and Mobile Developer currently pursuing studies in Lithuania. Skilled in building responsive interfaces and secure backend systems using React.js, React Native, and Laravel. Passionate about applying technical skills in a part-time role to gain local work experience and contribute to dynamic teams.

EXPERIENCE

Full Stack Developer php | CASAKOOL
Internship 2022-2023

Developed an ERP system using PHP to efficiently manage goods and inventory processes. The project involved designing and implementing modules for inventory tracking, order management, and supplier coordination. Key responsibilities included creating user-friendly interfaces, integrating database functionalities for real-time data updates, and ensuring secure and scalable backend operations. The internship provided hands-on experience in optimizing workflows, improving data accuracy, and enhancing overall operational efficiency.

Front End Developer React | KZ LEVAGE
Internship 2024

Built a client and employee management app with React.js, Tailwind CSS, and Firebase. Features included user profiles, activity tracking, and real-time database interactions, ensuring scalability, security, and a seamless user experience
